The voices, experiences and recommendations from Sweden's early OMOP adopters: *Some experiences of mapping Swedish register data*

Jonas Wastesson, Department of Medical Epidemiology and Biostatistics

Our experience

- Mapped a Swedish register extraction of the entire population 65 years and older (cumulative n=2.1 million)

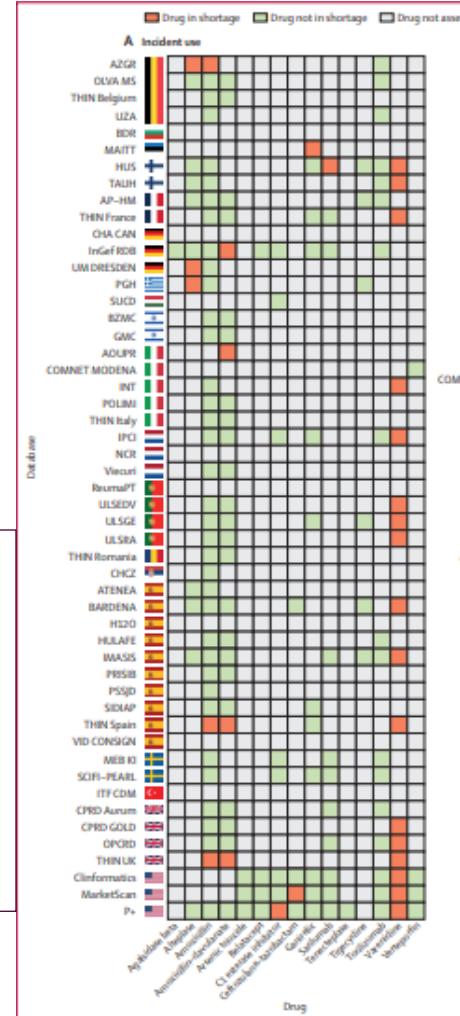

Changes in use and utilisation patterns of drugs with reported shortages between 2010 and 2024 in Europe and North America: a network cohort study

Success factors

Grant from EHDEN European Health Data & Evidence Network

Made it possible to dedicate time and resources to the mapping

Collaboration with a company certified to support with OMOP-mapping (MTG)

Working in a strong environment

Dedicated IT-unit with high-level competence

Existing structure for hosting large data volumes (e.g. approx 2million individuals)

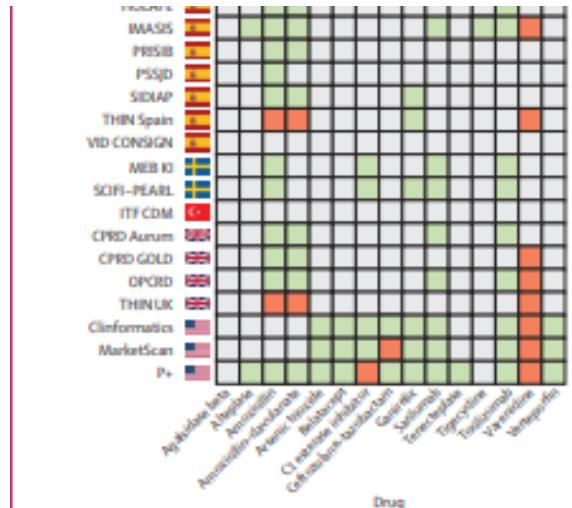

Good data insights

Long-term experience working with the data source being mapped

Access to experts on the mapping data source

The future

- Register data is not unique to any researcher, value in multiple mappings?
 - Finding collaborators with matching interests and mapped data
